

METZELER
ALWAYS TWO WHEELS AHEAD

Racetec SM

NEW

NEW generation Supermoto tyre

FEATURES:

- Brand new compounds, more adaptable to different racetrack conditions: progressive sliding with excellent traction
- Carcass tuned for predicability both on-road and off-road, with excellent self-damping
- Designed to eliminate chatter, tears and provide excellent grip, these tyres also deliver nimble handling for quicker transitions between turns and to facilitate easier drifting with constant performance throughout the entire race
- Wide-footprint front tyre supplies excellent rider control and feedback
- **New sizes 165/55R17, 125/80 R17, 125/80 R420**

REAR RANGE:

K1 – performs at its best on smooth to medium roughness asphalts in medium to low temperatures (above 17-19°) where tyre longevity is not of concern.

K2 – On medium to abrasive tracks, in all temperatures and for endurance.

FRONT RANGE:

K1 – suitable for use on smoother track surfaces in all temperatures.

K2 – fairly abrasive circuit, in all temperatures and for endurance.
